Installing F/E Customizations

Follow the steps described below to configure Order Entry Customization. The steps for making other customizations operational are similar.

1. Copy OE1100_FE66E.exe to any directory, for example, “[Programs]\FE66E”, where [Programs] is the Sage 300 program directory (by default, it is C:\Sage\Sage300)
2. Open Sage 300, and go to the folder from where you want to run the customization, for example the O/E Transactions folder
3. Right click on Sage 300 desktop, select Add New Program, enter a title, for example F/E O/E Entry, click the Next button
4. In the Command field browse to select OEORDD66A_FE66E.exe from the folder where you copied it in step 1. In our example it will be in “[Programs]\FE66E”
5. In the Arguments field copy the $objecthandle$ text
6. Click Finish
7. Setup F/E module
