Field Extender Enterprise™ 2027F

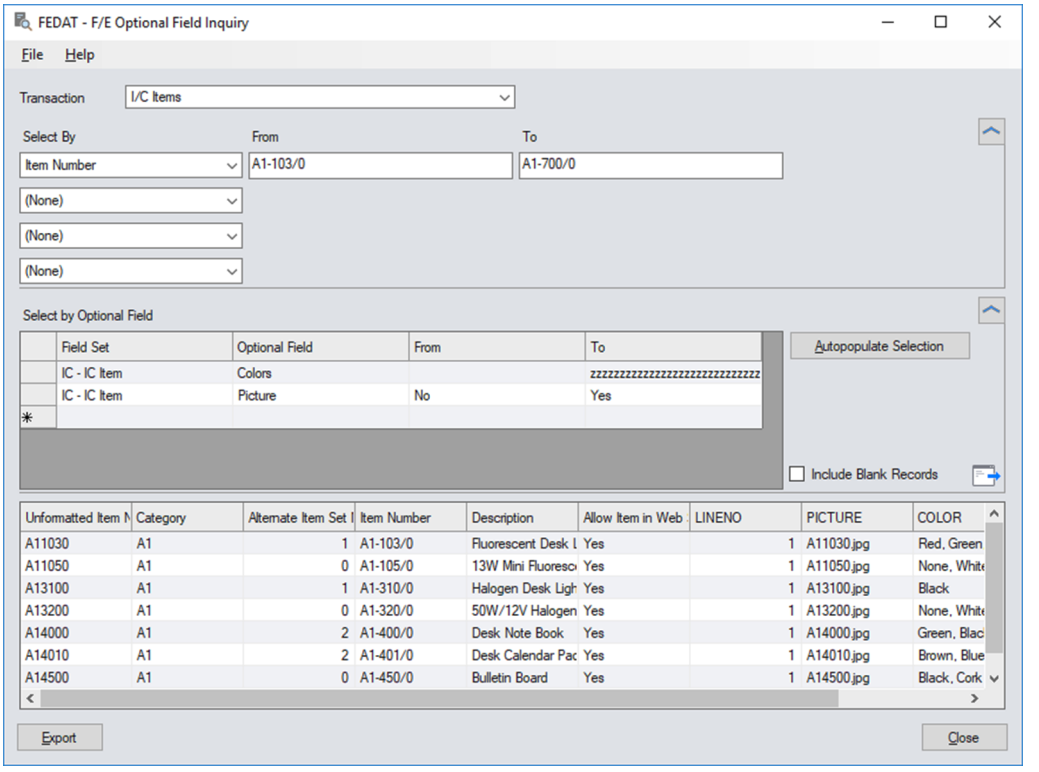

for Sage 300

Add Unlimited Optional Fields and Electronic Document Attachments to Any Sage 300 Transaction!

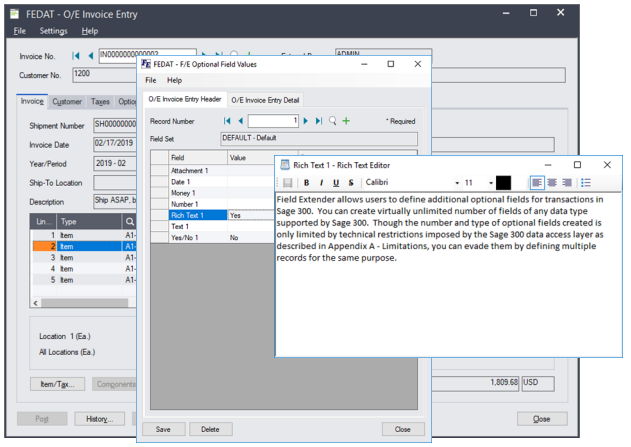

Field Extender™ Enterprise is an SDK application for the creation and maintenance of unlimited optional fields and electronic documents. Optional fields created by Field Extender are attached to Sage 300 transactions at Batch, Entry and Detail Line levels. Optional fields can be entered using Optional Field Values pop-up opened next to the corresponding Sage 300 screen without requiring any development.

To start using the Field Extender functionality you need to make just few clicks on Screen Configuration in the Field Extender setup.

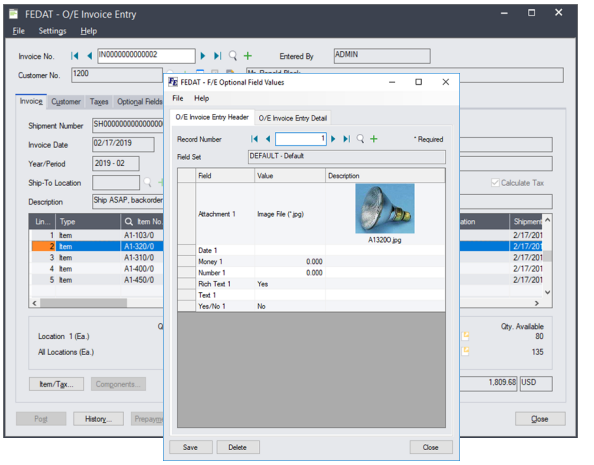

Field Extender is an excellent tool for creating advanced reports, implementing customized Sage 300 solutions and managing electronic documents. Any number of fields can be dynamically defined as "Electronic Attachment", "Date", "Numeric", "Boolean", "String" and many more types. Add images and specification sheets to "I/C Items", extending parameters for inventory items; or a dozen fields to "O/E Order/Invoice Entry" to capture order processing, shipping, forwarding and other sales related information; or add departments, regions, sales and product related fields to "G/L Journal Entry" at detail line level. Validate optional field values against existing Sage 300 tables, in addition to user defined validation tables. Your imagination is the limit!

Use the Optional Field Inquiry screen to look up optional field values for the selected transaction.

Rich Text Editor Available for Optional Fields

*Attach Files of **ANY** Format to Sage 300 Transactions*

Functional Features

- Supports Electronic Document Attachments.
- Supports Multiple FE Records per Sage 300 Record.
- Supports dynamic creation of "Date", "Numeric" and "String" fields. Other field types that can be used are the following: Binary, Boolean, Time, Integer, Long, Money, Real.
- Supports grouping of fields per Sage 300 UI.
- Supports Default Field Values.
- Supports Validation Against Sage 300 Tables.
- Supports Read Only Fields.
- Supports Hidden Fields.
- Supports Rich Text Fields with Import/Export functionality.
- Field Extender™ optional fields are entered from the Optional Field Values pop-up screen launched without any development.
- Optional Field Inquiry screen to look up optional field values.
- Supports web screens.

Business Benefits Gained as a Result of Implementing Field Extender:

- Adds Electronic Document Management to Sage 300.
- Adds Optional Fields anywhere in Sage 300.
- Extends reporting and inquiry capabilities.
- Adds fields on batch, entry, and detail line levels.
- Increases flexibility of data types.
- Supports 3rd Party SDK applications.
- Reduced Ongoing Costs with Easy Installation, Configuration & Support.

Technical Details

- Field Extender is a Sage 300 SDK application.
- Required Sage 300 modules: S/M.

Compatibility

- Sage 300 version 2027.
