PJC Security™ 2027B

for Sage 300

Advanced Security Solutions for PJC Contracts!

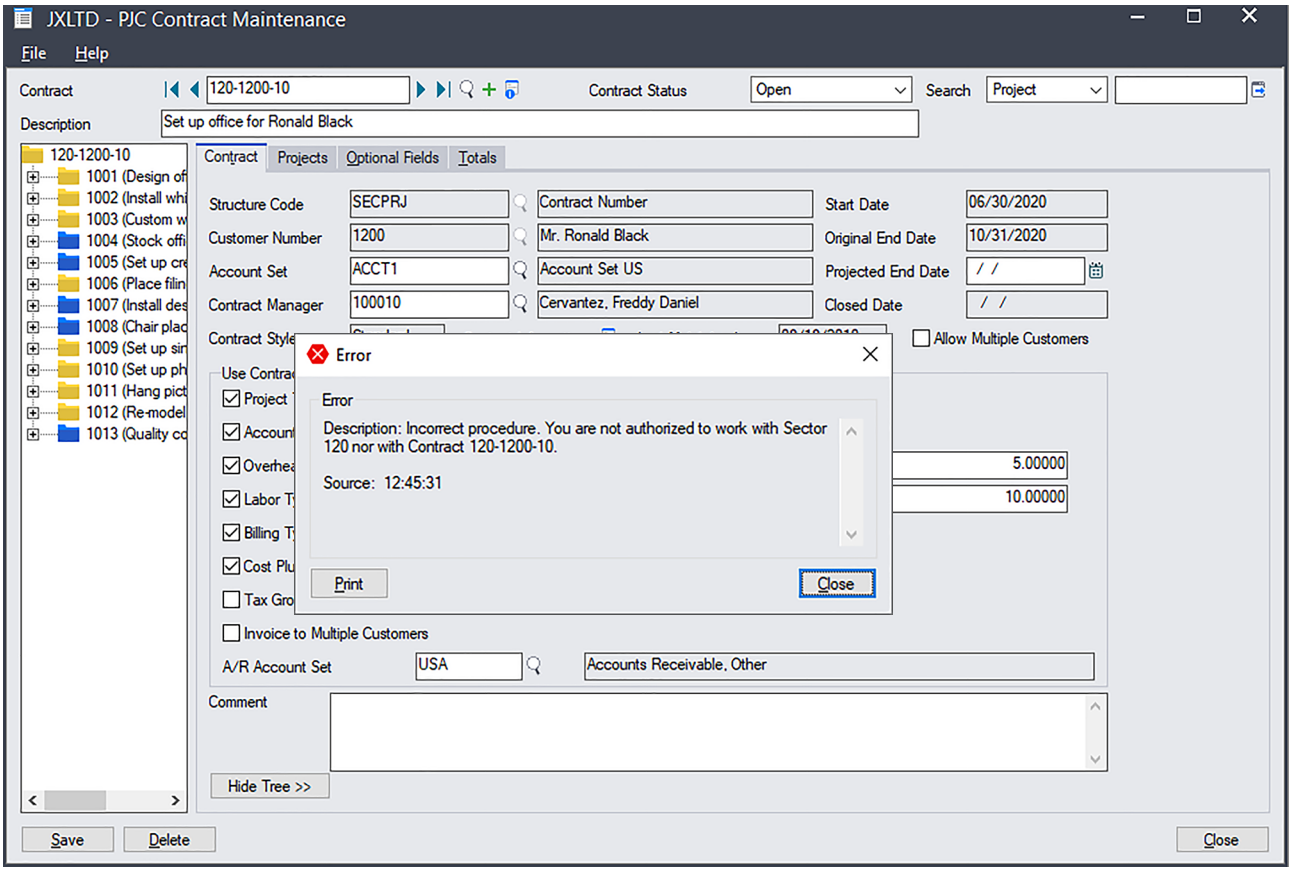

PJC Security (J/X) allows restricting user access to permitted Contracts only. Users will be able to enter transactions and view Contracts which they are authorized to work with. The authorization is based on the first Contract Segment defined in PJC Options or/and the list of contracts defined in PJC Contracts. For instance, if you have defined the first segment in the PJC Setup as department, branch or division in your company, you can authorize users to inquire and use only Contracts of their own departments, branches or divisions. You can also authorize users to inquire and use only those Contracts with which they work.

The areas which can be controlled by the application encompass the following:

- Using PJC Contracts in A/R and A/P invoices
- Using PJC Contracts in P/O transactions
- PJC Contract Maintenance and PJC transactions
- A number of predefined PJC reports

On the supported screens, users can inquire only for documents which do not contain any restricted Contracts in the entries or detail lines. Otherwise, the document is hidden in Finders or skipped during navigation. PJC Security also controls user access to PJC information via reports. Users can print 7 predefined PJC reports that display the Contract information only if the user is authorized to work with the Contract. All other PJC reports are hidden for the restricted users.

The application does not affect non-job-related transactions.

Functional Features

- Prevents users from inquiring restricted information on the screens.
- Prevents users from printing restricted information in reports.
- Supports user authorizations by the list of Contracts.
- Supports user authorizations by the first segment defined in PJC Options.
- Supports A/R, A/P, P/O and PJC specific screens.
- Transactions workflow remains the same.

Additional Information

- PJC Security is a Sage 300 SDK application.
- Supports Sage 300 Security.
- Supports Database DUMP & Database LOAD.
- Supports multilingual User Interfaces.

Business Benefits Gained As A Result Of Implementing PJC Security:

- Higher level of information security.
- Better management of internal information.
- Reduced time to find relevant information.
- Easy way to manage user authorizations.
- Easy installation, configuration and support.
- Simple and easy to use.

Compatibility

- Sage 300 version 2027.

Required Sage 300 Modules

- S/M, P/M.

About SYSTRONICS

SYSTRONICS is a Sage Software Development Partner and a Microsoft Gold Certified Partner, in business since 1977. SYSTRONICS has forged partnerships with Sage Software and Microsoft for over twenty years.

Applications Available From SYSTRONICS

- **AR-AP Settlements™**
- **BACCPAC™**
- **Cashflow Forecasting™**
