

I/C Multi-Location Cost Averaging™ 6.0B

for Sage ERP Accpac 6.0

I/C Multi-Location Cost Averaging™ is developed to meet a specific need by Sage ERP Accpac users, who wish to maintain the same cost for an item in all locations, rather than having different costs in each location as it is the case in Sage ERP Accpac I/C.

I/C Multi Location Cost Averaging recalculates the I/C Item cost by averaging costs of the item in all locations. Thus receipt or transfer of an item to a location affects not only the cost of that item in that location but also its cost in all locations. The User can select items for which cost is to be averaged by Item Number range and Receiving Slip Number range. I/C Multi-Location Cost Averaging adjusts the item cost using the Sage ERP Accpac I/C adjustment function.

I/C Multi-Location Cost Averaging integrates with Sage ERP Accpac I/C and P/O modules.

It is recommended that IC-MLCA Averaging is used after the following transactions are posted:

- Inventory Control transactions:
 - I/C Receipt
 - I/C Adjustment
 - I/C Transfer
 - I/C Assembly
 - I/C Physical Inventory Check
- Purchase Order transactions:
 - P/O Receipt
 - P/O Invoice
 - P/O Debit/Credit Note
 - P/O Return
- Order Entry transactions:
 - O/E Credit Note

Compatibility: Sage ERP Accpac version 6.0A.

I/C-MLCA 5.4B is compatible with Sage ERP Accpac versions 5.3A, 5.3B & 5.4A.

I/C-MLCA 5.5B is compatible with Sage ERP Accpac 5.5A.

I/C-MLCA 5.6B is compatible with Sage ERP Accpac 5.6A.

Required Sage ERP Accpac modules: S/M, I/C, P/O.
