

Trade Job CostingTM

Wholesale Industries
for Sage ERP Accpac

Trade Job Costing™ Wholesale Industries *for Sage ERP Accpac*

Wholesalers usually trade goods without keeping inventory. They assemble, sort and grade goods in large lots, break bulk, repack and finally redistribute in smaller lots. Share and commodity brokers deal in a similar way in that they buy shares and then sell them on again for a profit. Traders in lumber, fuel, chemicals and many others in the wholesale industry all operate in a dynamic fast-paced environment, and the ability to determine the profitability of each specific job is critical to their success.

Trade Job Costing™ Wholesale Industries for Sage ERP Accpac, is an integrated solution developed by SYSTRONICS LLC for the award-winning Sage ERP Accpac software that produces accurate and timely profitability reports for wholesale trading companies. It acts as a forward-planning tool for companies and individuals who want to identify the profitability of a particular job or an organizational unit at any particular time.

In addition to tracking analytical data on existing jobs, Trade Job Costing™ Wholesale Industries for Sage ERP Accpac, is particularly useful for fulfillment, commitment and margin analysis.
